Birds in Your Garden

There are many different types of bird that you might see in your garden. Here are a few of them:

Robin

Robins are very easy to spot in your garden. They have a red breast and a brown head and back. They have long legs and a short tail. They live in one area to stop other robins living there. They eat insects, fruit, seeds and worms.

Jackdaw

The jackdaw is a noisy bird. They are quite large and have a grey neck, a short beak and white eyes. They eat insects, dead animals and other birds' eggs. They live in woods, parks and gardens. Jackdaws steal things; not just food but objects too!

Blue tit

The blue tit is a very small bird with bright yellow and blue feathers. They eat insects, seeds and nuts. They eat from bird tables and live in garden nesting boxes.
