

Y6 Europe

Quick Summary

Europe is one of the world's seven continents. It is located entirely in the Northern Hemisphere and mostly in the Eastern Hemisphere. It is bordered by the Arctic Ocean to the north, the Atlantic Ocean to the west, the Mediterranean Sea to the south, and Asia to the east. Europe is generally accorded the status of a full continent because of its great physical size and the weight of its history and traditions.

Techniques

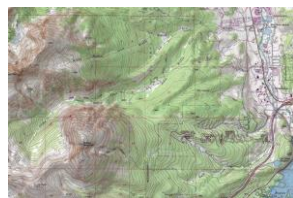

Maps and images for direction

Aerial images: The taking of **aerial** photographs for making **maps** and for geologic interpretation.

Maps: a visual representation of an area of land or sea showing physical features, cities, roads, etc.

Topographic maps: refers to maps at large and medium scales that incorporate a massive variety of information. All components of topographic maps carry equal importance. Topographic maps refer to a visual representation of three dimensional configuration of the surface of earth. Moreover, such maps show the size, shape and distribution of landscape features.
